

Take a closer look...

Gulf HyWay Oils are premium grade slideway lubricants designed to be used in machine tools that use one oil for both hydraulic systems and way lubrication.

Gulf HyWay Oils are designed for...

- Chains, cables and other parts requiring tackiness
- Horizontal and vertical slideways on machine tools, such as lathes, planers, shapers, drilling machines, milling machines, and screw machines
- Gulf HyWay ISO VG 32 and 68 are designed for use as a combination way oil, hydraulic oil and gear oil in machine tools where the circulating oil is supplied from a common reservoir. Gulf HyWay 220 is used for vertical slides as well as in some gearbox systems.

Gulf HyWay Oils provide the following benefits...

- Protect against rust and corrosion
- Excellent anti-stick-slip performance
- Excellent separation from metalworking coolant in the reservoir
- Special tackifier additive that allows machine tool carriages to start easily and move smoothly
