Gulf Premium Winter Diesel Additive

Gulf Premium Winter Diesel Additive is a premium, multifunctional winter diesel fuel additive that combines powerful cold flow improvers, wax anti-settling agents, and strong detergent dispersants.

Gulf Premium Winter Diesel Additive performs well in all types of diesel fuel including Ultra Low Sulfur Diesel (ULSD) and biodiesel blends up to B20 (20%).

RECOMMENDED DOSAGE:

Recommended dosage rate for B5 fuels or less is one gallon of additive to 2,000 gallons of diesel fuel.

Recommended dosage rate for fuels containing more than 5% bio is one gallon of additive to 1,000 gallons of diesel fuel.

PERFORMANCE FEATURES:

- Meets Ultra Low Sulfur Diesel (ULSD) Standard of less than 15 PPM
- Exceeds Cummins L-10 performance level for injector cleanliness
- Reduces Cold Filter Plugging Point (CFPP) up to 35°F
- Detergency boosters help keep fuel injectors clean
- Prevents loss of engine power
- Easier cold weather starting
- Contains anti-icing additives
- Excellent corrosion protection
- Decreases fuel consumption

TYPICAL CHARACTERISTICS:

Product Code	900000
Appearance	Clear Amber
Specific gravity, 60/60°F	0.901
Pounds per gallon	7.51
Flash Point (PMCC), °F (°C)	108 (42)
Pour Point, °F (°C)	-30 (-34)

AVAILABILITY:
