Subject: **Now Offering TRANSCREST® Synthetic CVT Fluid**

Gulf Lubricants is pleased to announce the availability of our all new, *full synthetic*, Continuously Variable Transmission fluid (CVT). This product is designed to meet today's most complex variable speed transmissions. ***Gulf TRANSCREST® Synthetic CVT Fluid*** is recommended for use in most North American and Asian vehicles equipped with belt or chain-driven CVT's.

Part Number: #332035

Available in bulk, drum, and pail quantities

Visit Gulf Lubricants website to find detailed information on our complete line of automatic transmission fluids: www.gulflubricants.net

- **Gulfpride® Synthetic Multi-Vehicle DEXRON VI**: Low-viscosity, fuel efficient. GM licensed and approved, suitable in most foreign and domestic transmission applications.
- **Gulfpride® Synthetic Multi-Vehicle ATF**: Full synthetic, excellent high and low temperature protection. Suitable for use in most of today's high performance transmissions calling for MERCON® V, DEXRON®-IIIH, Chryslers ATF+4 and many other foreign and domestic transmissions.
- **Gulfpride® Universal ATF**: Synthetic blend ATF suitable for a wide range of transmissions calling for: MERCON® V, DEXRON®-IIIH, Chrysler ATF 7176 +4, Toyota, and others
- **Gulfpride® Multi-Purpose ATF**: recommended for use in most automatic transmissions manufactured by General Motors and Ford for model years 2006 and prior calling for DEXRON-III and Mercon.
- **TRANSCREST® ATF, Type F**: Original designed for Ford passenger car and light duty truck transmissions built prior to 1977, and many 1977 – 1980 models. Product can also be used in certain agricultural equipment specifying a John Deere J21A fluid.
