

Take a closer look...

Gulf VP Preservative Oil is formulated to provide an effective rust preventive film on the internal surfaces of machinery during periods of seasonal change-out, shipping or equipment that will be out of service for long periods.

Gulf VP Preservative Oil is formulated with *vapor phase corrosion inhibitors* (VPCIs) that release corrosion inhibiting molecules into the airspace above the oil level providing a simple and inexpensive means to protect the internal surfaces and bearings of idled equipment against damaging rust and corrosion.

Gulf VP Preservative Oil is designed for...

- Farm and construction equipment during winter storage
- Summer downtime for school buses, vans, generators and snow plows, etc.
- Gearboxes, fuel tanks, transmissions, crankcases and other enclosed systems that are stored for an extended period of time

Gulf VP Preservative Oil provides the following benefits...

- Wax-Free / Cost Effective
- Protects parts after machining
- Excellent rust protection for surfaces above the oil level
- Designed to protect vertical metal surface in systems where oil normally drains away
