

Product Bulletin

GULF OPEN GEAR COMPOUNDS

Gulf Open Gear Compounds are high performance lubricants that are compounded to provide tackiness, adhesion, and lubrication of open gears under adverse conditions and various machine requirements. The adhesive nature of this product provides resistance to throw-off. It provides protection of components and cables found on hoists, cranes, swing gears, large press gears, draglines, shovels and dredges. Extreme pressure additives impart protection to machine surfaces under extremely heavy loads.

FEATURES AND BENEFITS:

- High film strength
- Water wash-off protection
- Fifth wheels
- Large slow-speed gears

Gulf Open Gear Compounds:

Typical Properties

Grade	Test Method	1500	3900
Product Code		343851	343855
Viscosity, cSt @ 40°C	ASTM D-2161	1550	3900
Gravity, API°	ASTM D-4052	20.3	25.7
Specific Gravity		.932	.900
Flash Point, °F	ASTM D-92	>400	>400
Texture		Smooth	Smooth
Color		Black	Black
