

Product Data Sheet

Open Gear Compound

High film strength, non-chlorinated

These lubricants that are compounded to provide tackiness, adhesion, and lubrication of open gears under adverse conditions and various machine requirements. The adhesive nature of this product provides resistance to throw-off. Extreme pressure additives impart protection to machine surfaces under extremely heavy loads.

Features and Benefits

- High film strength
- Fifth wheels
- Water wash-off protection
- Large slow-speed gears

Applications

- Hoists
- Large press gears
- Draglines
- Cranes
- Swing Gears
- Shovels and dredges

Typical Properties

Grade	Test Method	1500	3900
Product Code		343851	343855
Viscosity, cSt @ 40°C	ASTM D-2161	1550	3900
Gravity, API °	ASTM D-4052	20.3	25.7
Specific Gravity		0.932	0.900
Flash Point, °F	ASTM D-92	>400	>400
Texture		Smooth	Smooth
Color		Black	Black

These properties are typical of current production, minor variations are to be expected in normal manufacturing.
