Product Data Sheet

Premium Winter Diesel Additive

Prevents fuel gelling and protects against fuel-filter icing

Premium, multifunctional winter diesel fuel additive that combines powerful cold flow improvers, wax anti-settling agents, and strong detergent dispersants that performs well in all types of diesel fuel including Ultra Low Sulfur Diesel (USLD) and biodiesel blends up to B20 (20%).

Features and Benefits

- Decreases fuel consumption
- Contains anti-icing additives
- Prevents loss of engine power
- Reduces Cold Filter Plugging Point (CFPP) up to 35°F
- Decreases fuel consumption
- Easier cold weather starting
- Detergency boosters help keep fuel injectors clean
- Exceeds Cummins L-10 performance level for injector cleanliness

Applications

- Recommended dosage rate for B5 fuels or less is one gallon of additive to 2,000 gallons of diesel fuel.
- Recommended dosage rate for fuels containing more than 5% bio is one gallon of additive to 1,000 gallons of diesel fuel.

Typical Properties

Product Code	900000
Appearance	Clear Amber
Density, lb/gal	7.51
Specific gravity, 60/60°F	0.901
Pour Point, °F (°C)	-30 (-34)
Flash point, (PMCC), °F (°C)	108 (42)

These properties are typical of current production, minor variations are to be expected in normal manufacturing.
